*Tested with Teifs Basecoat

**DESCRIPTION:**
- 100% Acrylic-based elastomeric textured finish
- Dirt Pick-up Resistance (DPR) chemistry
- Highly flexible: can bridge pre-existing or existing hairline cracks
- Integrimly colored with high quality pigments

**USES:**
- Exterior finish coat for:
  - EIFS, One Coat Stucco, and Scratch & Brown stucco
  - New or existing stucco and concrete surfaces
  - Renovation of old stucco and concrete walls

**COMPOSITION:**
- Binder base: 100% elastomeric polymer with surface-hardening property
- Aggregate: Pure crushed marble, rust-free
- Pigment base: Titanium dioxide
- Color: Parex USA standard colors or tinted to desired custom color.
CHECK CONCRETE SURFACES FOR CRACKS OR CHIMNEY LININGS. NEW CONCRETE AND MASONRY MUST BE CLEAN AND CURED A MINIMUM OF 28 DAYS. FOR PREVIOUSLY PAINTED SURFACES, ALL RELEASE AGENTS OR BOND BREAKERS MUST BE REMOVED, AND GLOSSY SURFACES DULLED. LOOSE AND CHALKING PAINT MUST BE REMOVED, AND GLOSSY SURFACES DULLED.

SURFACE PREPARATION:
- Remove surface contaminants such as dust or dirt without damaging the substrate.
- For previously painted surfaces, all loose and chalking paint must be removed, and glossy surfaces dulled.
- New concrete and masonry must be clean and cured a minimum of 28 days.
- Check concrete surfaces for alkalinity and treat. Any form-release agents or bond breakers must be removed.

UNEVEN CONCRETE OR MASONRY CAN BE LEVELLED WITH ANY TeifsBase product or other suitable, compatible product. For interior drywall, prepare as for painting.

Parex USA recommends the use of primers to enhance the appearance and uniformity of the finish, improved coverage, and decrease the chance of efflorescence. This is especially true when using dark colors or finishes with a large aggregate. If specified, prime with Parex USA Primer or VariPrime Sanded, refer to Product Data Sheet.

For additional options, contact Parex USA Technical Services Department.

COVERAGE:
Depending on the condition of the substrate and method of application, approximate coverages per pail are:

E-Lastic Sand 1.0
Aggregate size: 1.0mm
150-165 ft² (14-15 m²)

E-Lastic Sand 1.5
Aggregate size: 1.5mm
120-135 ft² (11-12.5 m²)

E-Lastic Swirl 1.5
Aggregate size: 1.0mm
120-135 ft² (11-12.5 m²)

E-Lastic Choice 0.75
60-150 ft² (6-14 m²)

MIXING:
- Use clean equipment for mixing and preparation.
- Stir to obtain a homogeneous consistency using a heavy-duty 1/2-in. (13mm) drill with a rust free paddle at 400-500 rpm. Avoid air entrainment.
- A small amount of clean, potable water may be added to aid workability. Do not exceed 8 oz. (.25 L) per full pail of finish. To avoid color and texture variations, add the same amount of water to each pail of finish.

APPLICATION:
- Read the entire label before using this product.
- Always maintain a wet edge and work to corners or joints. For best color consistency, use finish with the same batch number within a wall section. Keep container closed when not in use.
- Use a clean stainless steel trowel and apply a uniform coat the thickness of the largest aggregate size of the finish.
- Texturing: Use a clean plastic float or stainless steel trowel, wipe frequently. Apply moderate pressure with consistent motion, rolling the large aggregates to obtain the desired texture.

LIMITATIONS:
- Ambient and surface temperature must be 40°F (4°C) or above during application and drying time. Supplemental heat and protection from precipitation must be provided as needed.
- Use only on surfaces that are sound, clean, dry, unpainted and free from any residue which may affect the ability of the finish to bond to the surface.
- Application in direct sunlight in hot weather may adversely affect aesthetics.
- Due to the composition of this product, minor pin holes may be noticeable in the cured finish.
- Parex USA is not responsible for color correctness after finish has been applied.

WARNING:
- Read complete warning information printed on product container prior to use. For medical emergency information, call 1-800-424-9300.
- For more information on handling this product refer to its Safety Data Sheet (SDS). The most current SDS and Product Data Sheet (PDS) can be found on our website.
- This Product Data Sheet has been prepared in good faith on the basis of information available at the time of publication. It is intended to provide users with information about the guidelines for the proper use and application of the covered product(s) under normal environmental and working conditions. Because each project is different, Parex USA, Inc. cannot be responsible for the consequences of variations in such conditions, or for unforeseen conditions.
